Summary

Full-stack web developer specializing in the MERN stack (MongoDB, Express, React, Node), seeking a full-stack or front-end developer role. I build responsive, accessible web applications end to end — from REST APIs and data models to polished React interfaces. Zuitt-trained and AWS-certified, with a growing portfolio of shipped projects and an analytical, detail-first mindset carried over from prior process and quality work.

Technical Skills

Front-End: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive / Mobile-First, Bootstrap, Figma, Wireframing, CSS Animations & Transitions, DOM Manipulation, ARIA Standards, Cross-Browser Compatibility, EmailJS

Back-End: Node.js, Express.js, Python, C#, ASP.NET, REST API Architecture, CRUD, Server-Side Routing, JWT Auth, Postman

Full-Stack: MERN Stack, Full-Stack Architecture, Component-Based Design, Data Flow Management, Cross-Functional Debugging, SDLC, Agile

Analysis & Data: Requirements Gathering, Process Mapping, Gap Analysis, User Stories, Data Modeling, ETL, Dashboards

Selected Projects

OrigamiKeys — Full-Stack E-Commerce Platform

Mar 2026 – Present

Full-stack e-commerce platform for a custom keyboard vendor (React, Node.js/Express, MongoDB/Mongoose). Site-wide theming system with four admin-selectable, server-persisted visual styles independent of each visitor's light/dark mode; a group-buy ordering flow; an admin dashboard with a drag-and-drop landing-page builder for products and categories; and a checkout/address-management system — built for accessible, theme-consistent UI.
<https://origamikeyscom.vercel.app/> — backend on Render's free tier; allow ~30–60s to wake on first load.

Mind Blogging — MERN Blog Platform

Full-stack blog platform with full CRUD post management: a React, component-based front-end talking to an Express/Node REST API backed by MongoDB. Built and shipped with Postman, Vercel, and GitHub.

Capstone 3 — Full-Stack E-Commerce (MERN)

Dec 2024

Full-stack MERN e-commerce platform: a React front-end with dynamic routing and state management, integrated APIs for server-side operations, deployed via AWS S3 static hosting.

Capstone 2 — Back-End E-Commerce REST API

Nov 2024

Back-end RESTful API for an e-commerce workflow — efficient data handling, secure transactions, and clean integration points for the front-end.
